

The Ascent of CAN

Supporting your next steps and helping you get to where you want to be

The CAN approach

Amazing scientific facts about you!

How many?!

An adult human body has around 206 bones while children have 300 bones. With time, many bones fuse together

Keep moving to the beat

Your heart beats around 100,000 times a day, 36.5 million times a year

Don't be a sloth!

An average human sleeps for around 35 to 40% of the day while sloths and armadillos sleep through 80% of the day

You don't stop growing

Your nose and ears continue growing throughout your entire life!

Your tongue is one of a kind

As well as having unique fingerprints, humans also have unique tongue prints
